

EL SEGADOR

LEGUMBRES

Legumbres Baena es una empresa especializada la producción, envasado y comercialización de legumbres secas y cocidas de cultivo ecológico bajo nuestra marca "El Segador". Mediante estrictos controles, la empresa garantiza la calidad desde la elección de las mejores tierras de cultivo, la selección de las mejores semillas para la siembra, hasta la posterior clasificación del grano y envasado del producto final.

El Segador dispone de una amplia gama de productos y ofrece la mejor selección de variedades de legumbres ecológicas de nuestro campo. Dado su conocimiento del sector, guiados por su filosofía de respeto al medio ambiente y preocupados por la calidad agroalimentaria, Legumbres Baena ofrece la combinación perfecta entre técnicas innovadoras y sabor tradicional.

Nuestra gama de productos ecológicos se comercializa en todo el territorio nacional y mercados exteriores principalmente en Europa, Alemania, Suiza y Reino Unido, donde son reconocidos y solicitados por su calidad.

"El Segador"

Legumbres Baena is a company specializing in the production, packaging and marketing of dry and cooked legumes which are ecologically grown under our brand name "El Segador". Our company is able to guarantee the highest quality thanks to our strict controls, from choosing the best land for cultivation, the best seeds for planting, right up to the subsequent classification process of the grain and packaging of the final product.

El Segador offers a wide range of products, selecting the best varieties of ecologically-grown legumes from our fields. Due to an in-depth knowledge of the sector, a philosophy based on respecting the environment, and a concern for quality in agrofood, Legumbres Baena offers the perfect balance between innovation and traditional flavour.

Our range of ecological products are sold all over the country, and we also export to foreign markets, mainly in Europe. In countries such as Germany, Switzerland and The United Kingdom, our products are well-known and in high demand for their quality.

El Segador, natural y saludable

Desde la antigüedad ya se establecía una relación clara entre la alimentación y salud, nosotros apostamos por una alimentación más sincronizada con las estaciones climáticas, con los ciclos de producción naturales y, sobre todo, más limpia. Con un sistema de producción que prescinde de productos químicos.

Control oficial y garantía certificada

Además de los controles oficiales que se efectúan a todos los alimentos, los productos ecológicos El Segador son objeto de una certificación adicional que garantiza la autenticidad de su origen ecológico. El CAAE entidad de certificación autorizada inspecciona cada año nuestra explotación e industria ecológica. Dotándonos de la correspondiente certificación y número de productor ecológico autorizado. En los alimentos ecológicos la trazabilidad y autenticidad está garantizada.

"El Segador", natural and healthy

Since ancient times, there has been a clear relationship between our health and what we eat. Our company believes in a method of food production which is more in line with seasonal changes and natural production cycles. Most of all, we believe in a cleaner production system free of all chemical products.

Official Control and Certified Quality

As well as the official checks carried out on all produce, the ecological products of El Segador also undergo an additional certification which guarantees the authenticity of their ecological background. The CAAE (Andalusian Committee for Organic Farming) - an authorized regulatory body - inspects our operations and ecological industry every year. This body awards us the corresponding certificate and an official number for being an authorized ecological producer. With ecological produce, the source and quality are guaranteed.

La agricultura ecológica gestiona óptimamente los recursos naturales evitando el uso de abonos químicos ni pesticidas, logrando de esta manera obtener productos orgánicos conservando la fertilidad de la tierra y respetando el medio ambiente.

Ecological agriculture makes the most of natural resources, avoiding the use of chemical products and pesticides. This yields more organic produce, conserves the fertility of the land, and respects the environment.
